## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. Claims 6-8, 10, 11, 20-28 and 30-37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Support in the specification cannot be found for the portion of the amendment to claim 6 which reads "at least one of." The specification provides support for the use of functionalized short chain living polymer for the preparation of the multifunctional macroinitiator. However, the clause "at least one of said short-chain living polymer includes a functional group" implies that the multifunctional macroinitiator may be prepared with a mixture of functionalized and unfunctionalized short chain living polymers, and no description of this concept can be found in the specification.

2. Claim 30 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 30 is indefinite because it depends from a cancelled claim.

***Claim Rejections - 35 USC § 102***

3. Claims 6-8, 20-23 and 31-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Knauss (US 6,255,424) for the reasons set forth in item 3 of the Office action mailed 3/24/2006.

***Claim Rejections - 35 USC § 103***

5. Claims 10, 11 and 24-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knauss (US 6,255,424) for the reasons set forth in item 5 of the Office action mailed 3/24/2006.

***Response to Argument***

6. Applicant's arguments filed 7/24/2006 have been fully considered but they are not persuasive. Traversal is based on the amendment to claim 6 which requires that the living polymer segments include a functional group. A "functional group" as commonly understood in organic chemistry is any atomic or molecular moiety other than saturated hydrocarbon. Therefore, the polymer segments of Knauss have a "functional group" because they include aromatic functionalities.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

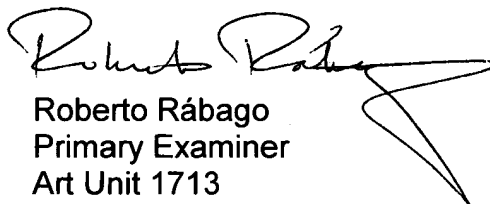

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
